The New Answers Book: Over 25 Questions On Creation / Evolution And The Bible

Synopsis

Evolution...intelligent design...creation...or a little of all three? What do you really believe - and why does it matter to your life, your family, and your faith today? Christians live in a culture with more questions than ever - questions that affect one's acceptance of the Bible as authoritative and trustworthy. Now, discover easy-to-understand answers that reach core truths of the Christian faith and apply the biblical worldview to these subjects: Genesis, the Days of Creation, millions of years, evolution, dinosaurs, carbon dating, UFOs, death & suffering, Noah's Ark and Flood, fossils, starlight and time ...and much more. Explore these and other topics, answered biblically and logically in this book from the world's largest apologetics ministry, Answers in Genesis. Timely and scientifically solid, The New Answers Book 1 offers concise answers from leading creationist Ken Ham and scientists such as Dr. David Menton, Dr. Georgia Purdom, Dr. Andrew Snelling, Dr. Jason Lisle, and many more.

Customer Reviews

Compiled by Answers in Genesis, the world's largest apologetics ministry, The New Answers Book: Over 25 Questions on Creation/Evolution and the Bible presents the fundamentalist Christian perspective upon the debate of creation versus evolution versus intelligent design. Founded upon the core principle that the Bible is God's Word and can be trusted implicitly, as opposed to the changing theories of fallible mankind, The New Answers Book gives a strict Biblical interpretation of the existence of fossils, carbon dating, UFOs, the question of death and suffering, and much more, with a handful of black-and-white illustrations. "If one allows science (which has wrongly become

synonymous with evolution and materialism) to determine our understanding of Scripture, then this can lead to a slippery slope of unbelief through the rest of Scripture. For instance, science would proclaim that a person cannot be raised from the dead. Does this mean we should interpret the Resurrection of Christ to reflect this? Sadly, some do just this, saying that the Resurrection simply means that Jesus' teachings live on in His followers." A cogently written account that straightforwardly and unabashedly makes its case.

Sorry, I'm still laughing at Carl's misguided misquoted twisting of the Book of Job below!! Please leave Biblical hermeneutics to those who know what they are doing. Read Carl's review below for humor - read The New Answers Book for an awesome handling of this Creation/Evolution issue. I'm not sure too many Evolutionists are aware of the Scientific Dissent from Darwinism - which one can Google to read about. Nearly a thousand scientists from all across the nation (Stanford, Yale, Smithsonian Institute, just to name a few places) have signed the document stating that Darwin's theory is flawed, misguided and indefensible. Despite this, Evolutionists still love to mistakenly claim that Creationists have neither real science nor any real scientists behind their views. Sadly much of the public is following the rest of the lemmings off of the cliff on this issue. The evidence presented in this book is quite compelling (unless you choose to close your eyes to it) and evidence given that dinosaurs co-existed with man is simply undeniable. I've still yet to hear an Evolutionist give a good reason for the dinosaur footprints found alongside of human footprints in the Paluxy River bed, near Glen Rose, Texas. Many other great topics are covered as well such as starlight and time, the fossil record and carbon dating just to name a few.

I own all 4 volumes of Ken's "ANSWERS" books. While they give some great information I feel some of the answers are a bit soft approached. I'm not a fan of Ken Ham personally, while I agree with Him as a fellow Christian, I'd like to see his work include more detailed and aggressive refutes and answers. I understand these books are more suited to the lay person, so in that context they are great. These are great books for the average Christian who really wants a simpler answer to questions they might have.

This book will place at your fingertips helpful ideas to check out for yourself. The other intolerant and unkind reviewer was obviously grinding the proverbial ax. I have a copy of the unrevised book and found it very thought provoking in how it pointed out the very real problems with the model of Darwin as well as presenting lots of scientific data for an alternate view. It takes far more faith to believe the

twisted evidence presented by Darwin's current followers than to believe the evidence from those who cite scientific evidence for some sort of intelligent design. Ham is not a ranting Bible thumper. He is coming with real ideas and evidence. If this updated version is anything like the former issue it will deal with most the main sections of the debate and give you a good heads up. Dembski and Behe will go much deeper, but Ham is a good, real good, place to begin. As for the dinosaurs living at the same time as man, you owe it to yourself to see the evidence for this. You will not get the real story presented by anyone sympathetic to the Darwin model. I seriously wonder if the only reason evolutionists do not accept this and other similar arguments for a younger earth is that it would remove the incredible amounts of time that evolutionists think they must have for the impossible scenario of all the many missing links to somehow connect. I give it 5 stars as an strong introduction to the subject, which is what it is. I'm ordering it today and will update my review if it's not at least as good as the earlier edition.

Very interesting. My daughter used this book to supplement school. Lots of science to back up these Biblical views. Questions like "Doesn't Carbon-14 Dating disprove the Bible?" Great resource!

This book is incredibly informative, very, very detailed. A little hard to just pick up and read but very useful as a reference. Will keep this one on the shelf for graduate work as an informative, scientific reference.

This is an enlightening book that offers alternatives to evolutionary theories. There are two main theories: (1) The world is so complexed that it must all have happened by accident. (2) There is an intelligent Creator behind the development of the universe. Ken was wise not to address each and every question by himself but rather use authorities of each specific field to identify the weakness of the #1 theory and offer the views of the #2 theory. This is a must read to those that have questions about their faith and whether it has scientific standing. One particular topic that the average Joe will enjoy is about the weaknesses of the carbon dating methods. The very foundation of how they claim the world is 'XXXX billions of years old'. Or even humorous questions like how would dinosaurs fit in Noah's ark? (Answer: Probably eggs/baby dinos!) Illustrated, creative, and mixed in with some humor and real science makes this book an easy read. Don Sausa Author of The Jesus Tomb: Is It Fact or Fiction? Scholars Chime In
