Grade Level: 9 - 12

Customer Reviews

My super smart son lost his book !! I bought this as a quick replacement. The binding had come undone, there was writing all in the book. I had to super glue the binding and tape the pages back together.

Very colorful diagrams and plenty of diagrams to aid in the understanding process. about as exciting as any biology book can be. haha

Ordered a NEW book. Upon taking the shrink wrap off the textbook, names were written in the front of the book. Misrepresented product. It was not new.

It is very thorough

Great purchase! Easy transaction.

Great buy, nearly new condition!

Just as advertised, perfect condition, quick delivery. It's important to make sure you are getting the right printing of this book if you are using it for a class. There are several by this author and it is easy to mistakenly pick an older version.

I am physicist and found this book very useful.
