# Red Lace, Yellow Lace

## Synopsis

This best-selling title offers an ingenious approach to teaching little ones to tie their shoes. Inside, irresistible rhyming text guides children through the process step-by-step. "Red lace, yellow lace, Here's how you begin: Make an X but leave a space, To poke the red lace in." Sunny full-color illustrations demonstrate the steps and, the most fun—children can follow along on a model shoe with real laces! A gentle and engaging lesson that also challenges toddlers' hand-eye coordination.

## Customer Reviews

I was disappointed with this book and returned it. It teaches tying laces by making two loops and tying the loops together. I was looking for a book that taught the "one-loop, wrap around, push through" method. On the plus side, it is a very sturdy book that would take much abuse from a small child.

After spending a few months trying to teach my then four year old how to tie her shoes (and succeeding only in frustrating her), her babysitter gave her this book as a gift. Within a week or two, she was tying her shoes perfectly! I like the book's construction (it's a board book) and the model shoe and illustrations that teach shoe tying with a little catchy poem. The shoe model at the bottom of the book has one lace in it that is red on one end and yellow on the other and the different colors

makes shoe tying easier for beginners. This book is now my "standard" gift to children turning four.

I have used this book in therapy to teach older kids (who had given up) to learn to tie their shoes. This tool has especially been successful with people who learn visually. There are a few pictures that I find a little confusing, that is why the 4 star rating, so I turn the pages as they tie and I skip over those. I basically use 4 - 6 of the pictures. I give the minimal verbal prompts of criss-cross, down and through for each section (twice). I have 2 books. You can use one to model if you need to, and after they learn to tie with the book, I take the shoe lace out of the 2nd book and put it in their shoe. Then they can continue to follow the colors if they need to on the actual shoe until they are doing it independently. Very exciting for them to see success after years of failed attempts!

We purchased this book because our daughter is great at learning rhymes and we thought it would help her learn to tie her shoe. We were disappointed that it teaches the "rabbit ears" knot, but even more disappointed to find two of the illustrations out of sequence. That type of error make learning very difficult.

I ordered this for my son who is mildly autistic. He has been very discouraged attempting to learn to tie his shoe. Usually our shoe tying attempts have resulted in tears and meltdowns. (sometimes from me, lol)He initially was very reluctant to try this book, but on the very first attempt he was able to tie the laces. He was very proud of this accomplishment and even showed his younger brother how to tie the laces. I would recommend this book to anyone that needs to teach either a young child or someone with ASD how to lace and tie shoes.

The book is a wonderful book, but the lace is not anchored to the book. Your toddler can pull it out and wrap it around his or her neck. Make sure you anchor it to the book (with glue or tape on the back)

I bought this book for my oldest daughter after realizing that she couldn't tie her shoes at 7 years old, thanks a lot slip on shoes.She learned how to tie her shoes in only one day. The book is extremely simple to read and follow along. The text makes sense and with two different colored laces it makes it simple to use.

My 5 year old son has been struggling to learn to tie his shoe...and I have been struggling on ways

to teach him so he gets it. So I went to and searched for "teach tie shoes" and came up with tons of products. I read the reviews of a few products, but settled on this because it had the MOST reviews. When it arrived, my son was so excited. We went through it step-by-step, page-by-page, and he got it on the first try. I couldn't believe it, so he did it again and again.....and he did it! Then we tried it with a real shoe, and a half hour later he knew how to tie his shoes. I even added the extra step to double knot them. The dual colored shoe laces paired with easy visual steps made this one of the best things I've ever bought from . I wish I had gotten it earlier. Thank you author Mark Casey!!!
